

ENERGY AND WATER MANAGEMENT POLICY STATEMENT

Green Energy International is committed to responsible energy and water management as part of an overall environmental strategy. The senior management recognise the environmental challenges caused by climate change and as a developer of solar PV systems we acknowledge the importance of our role in helping to tackle those challenges. By the efficient management of energy and water resources at both its' head office and onsite operations Green Energy International aim to minimise

- Energy and water use
- Energy and water costs
- The environmental impact of harmful emissions
- Depletion of fossil fuels.

These aims will be achieved by

1. Compliance with all applicable legal requirements
2. To utilise energy and water as efficiently as possible by no cost measures (i.e. good housekeeping).
3. To minimise gaseous emissions and waste products which are likely to cause damage to the environment
4. To increase the energy and water awareness of staff, suppliers and sub-contractors
5. Set photocopying, computing & printing equipment to energy saving mode
6. Switch off appliances when not in use
7. Travel by public transport wherever possible
8. Encourage energy saving initiatives & celebrate good practice from employees
9. Achieve ISO 50001 at an appropriate time in the company's development.

This policy will be revised:

- When there are major changes in the size and nature of the business
- When new legislation comes into force or is updated
- Annually to ensure the policy remains up-to-date.
